

Random Solo,
Design by Chia-Ying Lee

Model Random Solo 12

Six perfect spheres floating in the air like gentle glass bubbles. Random Solo revisits the concept of the Random suspension lamp by parting the original three-piece cluster and releasing the individuality of the spherical shapes, which float like bubbles of light, letting you imagine compositions of luminous harmonies. Thanks to the new 10 cm size, there are now six dimensions and seven different finishes available, offering ample styling freedom, both as individually suspended light points and in lightweight and lively combinations on clusters.
